

YARN SOURCING DESK

Yarn Procurement Portal

User Manual

From requirement to the right vendor — one clear thread.
Raise · Approve · Send RFQ · Compare · Award.

GETTING STARTED

Welcome

The Yarn Procurement Portal is the single place where the yarn sourcing desk turns a need for yarn into a confident purchasing decision. It carries every requirement from the moment it is raised, through approval, vendor quotations and a side-by-side comparison, to the final award — with a clear record at every step.

This manual walks you through the portal screen by screen. It is written for everyday users — no technical knowledge is needed. Use the role guide to see what you can do, then follow the workflow chapter to run a requirement end to end.

In one sentence

Raise a requirement, send it to several vendors at once, let the portal compare their quotes on price, delivery, payment terms and rating, and award the best one — with last purchase prices and certificate alerts always in view.

What the portal does for you

- Keeps requirements, approvals, quotes and awards in one organised place.
- Invites multiple vendors with a single click and collects their rates online.
- Builds an automatic comparison and highlights the recommended vendor.
- Remembers the last purchase price so you always know if a quote is competitive.
- Tracks vendor certificates and warns you before they expire.
- Shows live yarn market price trends to support negotiation.

ROLES & ACCESS

Who does what

Everyone signs in with their own account. What you see and can do depends on your role. If you need access changed, contact your portal administrator.

Requisitioner

Raises yarn requirements and edits them before approval.

Procurement

Sends RFQs to vendors, records quotes, manages the vendor and yarn masters.

Department Head

Approves or rejects requirements and awards the order from the comparison.

Administrator

Everything above, plus managing user accounts.

A quick word on the workflow

A requirement moves through clear stages — Requested, Approved, RFQ Sent, Collecting Quotes, Ready to Award, and Awarded. The coloured tracker at the top of every requirement shows exactly where it stands.

Signing in

Open the portal in your browser, enter your email and password, and you will land on your dashboard. You can switch between a light and a dark (purple) appearance at any time using the toggle at the bottom of the menu.

Illustration: The sign-in screen. Enter your work email and password to continue.

THE HOME SCREEN

Your dashboard

The dashboard is your starting point each day. At a glance it shows how many requirements are waiting for approval, how many are out collecting quotes, which are ready to award, and the savings achieved so far. Below the figures, a live chart tracks yarn market prices.

Illustration: The dashboard — key figures across the top and the yarn price trend below.

- Click any figure to jump straight to that list of requirements.
- The left-hand menu takes you to Requirements, Vendor Master, Yarn & Prices and Awards.
- Certificate expiry warnings appear here so nothing slips past its renewal date.

THE CORE WORKFLOW

Running a requirement

This is the heart of the portal — the journey from a yarn need to an awarded order. Each step is handled by the right role, and the portal moves the requirement forward automatically.

- 1 Raise the requirement (Requisitioner)**
Choose New Requirement, give it a title, add the yarn items and quantities, and submit. The last purchase price fills in automatically for reference.
- 2 Approve it (Department Head)**
The department head opens the requirement and approves it (or rejects it with a reason). Only approved requirements can go out to vendors.
- 3 Send the RFQ (Procurement)**
Pick the vendors to invite. Each receives a unique link to quote online; you can also share a ready-made email or a printable PDF.
- 4 Collect quotes (Vendors / Procurement)**
Vendors submit their rates through their link, or procurement enters quotes received by phone or email on their behalf.
- 5 Compare (Procurement / Head)**
The portal builds a side-by-side comparison and recommends a vendor. Decision weights can be tuned live.
- 6 Award (Department Head)**
The head selects the vendor for each item and awards. The awarded price becomes the new "last purchase price".

Step 1 — Raise a requirement

A requirement is a list of the yarns you need and how much of each. Add each item by its material code; the description, last purchase price and last supplier appear automatically so you can see the history while you type.

The screenshot shows a web browser window with the URL 'yp.ddecor.com'. On the left is a dark blue sidebar with the D'DECOR logo and navigation links: Dashboard, Requirements, Vendors, Yarn & Prices, and Awards. The main content area is titled 'New Requirement' and contains four text input fields: 'TITLE OF REQUIREMENT', 'MATERIAL / YARN CODE', 'REQUIRED QUANTITY (KG)', and 'NEEDED BY'. Below these fields is an orange 'SUBMIT' button.

Illustration: Creating a new requirement. Add each yarn line with its quantity and target date.

Tip

Set a realistic "needed by" date and priority. These help procurement plan the RFQ due dates and help the department head triage what to approve first.

Step 2 — Approval

The department head reviews the requirement and approves it with a single click, or rejects it with a short reason that is recorded and visible to the requisitioner. Until a requirement is approved, vendors cannot be invited.

Step 3 — Send the RFQ to vendors

Open an approved requirement and choose Send / add RFQ, then tick the vendors you want to invite and set an optional due date. Each vendor gets their own secure quote link. For every vendor you can:

- Copy a ready-to-send email containing the link, or open it directly in Outlook.
- Copy just the link to paste into your own message or a chat.
- Download a neat PDF of the RFQ to attach.

Automatic emailing

If your organisation has switched on email sending, the portal can deliver these RFQs and reminders for you. If not, you simply send the prepared draft from your own mailbox — nothing is lost either way.

Step 4 — Vendors submit their quotes

Vendors open their link — no login needed — see exactly the items requested, and enter a price per Kg, GST, delivery lead time, payment terms and any remarks. They can save and come back until the due date. If a vendor sends rates another way, procurement records them using Enter quote.

Awards

Vendor Quote — D'Decor

Please enter your best rates:

2/30 Spun Polyester — 5,000 Kg	Rs/Kg	GST%
1/30 Combed Cotton — 2,000 Kg	Rs/Kg	GST%

SUBMIT QUOTE

Illustration: The vendor's quote page. They fill in rates per item and submit — no account required.

MAKING THE CALL

Comparing & awarding

Once quotes start arriving, the portal lays them out side by side for each item — price, delivery time, payment terms, vendor rating and the saving against the last purchase price. A recommended vendor is highlighted so the obvious choice stands out, while the full picture stays visible.

Illustration: The comparison — vendors side by side, with the recommended option marked Best.

Tuning the recommendation

The recommendation balances price, lead time, payment terms and rating. You can adjust how much each factor matters using the decision weights, and the scores update instantly — useful when delivery speed matters more than a small price difference, or vice versa.

Awarding the order

The department head selects the winning vendor for each item and awards. The chosen prices are saved as the new "last purchase price", so the next time this yarn is needed, everyone immediately sees the most recent benchmark.

Why the saving matters

Every award records the difference against the previous purchase price. Over time the Awards & Savings screen adds these up, giving the desk a clear picture of the value it has delivered.

MASTER DATA

Vendors & yarn

Vendor master

The vendor master holds every spinner and trader you source from — contact details, GST number, rating, default payment terms and lead time, and their quality certificates. Each vendor card shows their rating and certificate status at a glance.

Illustration: The vendor master — ratings and certificate status visible on each card.

- Add or edit vendors, and mark them inactive to retire them without losing history.
- Record certificates (OEKO-TEX, GOTS, GRS and others) with their expiry dates.
- The portal warns you when a certificate is within 30 days of expiry — so renewals are never missed.

Yarn & prices

The yarn master lists every material with its code, description and category. Alongside it, the portal keeps a price history — both your own purchase prices and the wider market trend — so you can see how each yarn has moved over time and quote-check with confidence.

KEEPING QUOTES ON TIME

Reminders & follow-up

Vendors sometimes need a nudge. On any requirement, procurement can send a polite reminder to a single vendor who has not yet responded, or nudge every pending vendor at once. The portal keeps count of how many reminders each vendor has had and when the last one was sent.

- Use Remind next to a vendor who is still to quote.
- Use Nudge pending to remind everyone outstanding in one click.
- Vendors who have already quoted or declined are never reminded.

Gentle by design

Reminders are courteous and include the same quote link, so a vendor can respond immediately. If automatic emailing is off, the portal still prepares the reminder for you to send manually.

Theme & comfort

The portal offers a light appearance and a dark purple appearance. Choose whichever is easier on your eyes using the toggle at the bottom of the menu — your choice is remembered for next time.

FOR ADMINISTRATORS

Administration

Administrators can manage who has access to the portal. From the Users screen you can add a new colleague, set their role, reset a password, or deactivate someone who has left — all without losing any of the history they were part of.

- Add a user with their name, email and role.
- Change a role or reset a password at any time.
- Deactivate (rather than delete) to keep records intact.

Activity record

For oversight, the portal keeps a record of key actions — who raised, approved, quoted or awarded what, and when. This gives administrators a clear, trustworthy history of activity across the desk.

QUICK REFERENCE

Questions & terms

Frequently asked

Can I edit a requirement after submitting?

Yes, until it is approved. After approval, ask procurement or the department head.

A vendor says their link doesn't work.

Re-send the RFQ from the requirement; a fresh link is generated for them.

Do vendors need an account?

No. They quote through their personal link without signing in.

Where does the “last PO price” come from?

It is the most recent awarded price for that yarn, updated automatically each time you award.

Can two vendors win the same requirement?

Yes — the department head can award different items to different vendors.

Glossary

Requirement	A request for one or more yarns, with quantities — the start of the process.
RFQ	Request for Quotation — the invitation sent to vendors to quote on a requirement.
Quote	A vendor's offered prices and terms for the requested yarns.
Comparison	The side-by-side view that scores vendors and recommends one.
Award	The decision that assigns a requirement's items to the chosen vendor(s).
Last PO price	The most recent purchase price for a yarn, used as a benchmark.

One clear thread, from need to order.

Thank you for using the Yarn Procurement Portal. For help or access, contact your portal administrator.
